

Lindab's Environmental Policy

Lindab's activities must be sustainable in the long term with regards to the economy, social responsibility and the impact on the environment as well as on people's health.

We will create products that simplify construction for our customers and offer the best solutions from the product lifecycle perspective. Environmental consideration will pervade our organization in order to minimize the environmental impact of the products and of the business. Our customers must feel confident in Lindab from an environmental and health viewpoint.

Products

Our products result in a minimized environmental impact and meet the requirements of the future:

- We develop the products from a lifecycle perspective in order to minimize resource use and negative environmental effects
- We provide basic data and interact with the customer in order to achieve energy and resource efficient solutions
- The included materials are recyclable to the greatest possible extent.
- The chemicals used are checked and hazardous substances are reduced or replaced
- We limit the environmental load from transport through production planning and logistics

Corporate Activities

Our corporate activities are carried out with consideration to the environment and the surrounding world:

- We provide education and information for all employees in order to create understanding and commitment to for our environmental work
- We follow the current laws and regulations, whilst planning to meet future demands in national and international legislation
- We have certified environmental management systems according to ISO 14001 for the bigger producing units
- We continuously evaluate our environmental impact and set objectives in order to achieve permanent improvements
- We control and limit the use of dangerous substances
- We are minimizing the utilization of resources such as energy and raw materials
- We are reducing the amount of waste and increasing recycling
- We inform our suppliers about our environmental work and set requirements in order to achieve improvements jointly
- We inform owners and stakeholders about our environmental work and the results
