

## Download guide

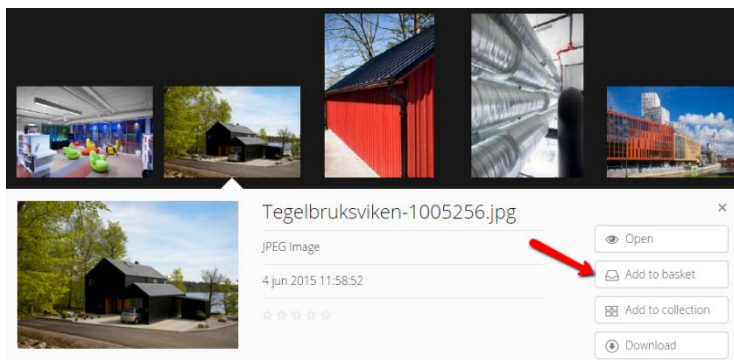

1. Select one image, click on it and a menu will appear and from there choose “Download”.

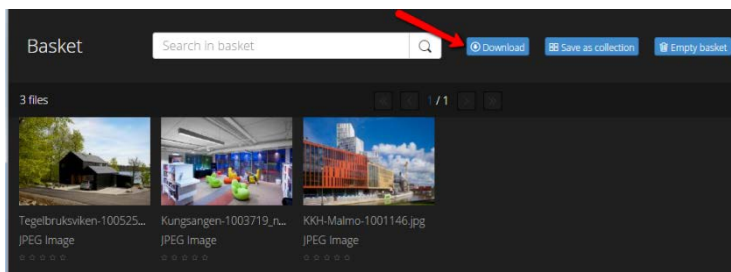

2. You will now have a couple of download options – choose one and press “Download” and the image will start downloading in your browser.

## Download multiple images

1. Select one image, click on it and a menu will appear and from there choose “Add to basket”. Select as many images you like in the same way.

2. You have your basket in the top link bar (it will show how many images it contains). Click on it and it will show the selected images and you will also have an option to download.

When you click on “Download” a zip-file with your selected images will start downloading in your browser.
