

Lindab Coverline™

Lindab Tile Effect Roofing
Make a lasting impression

Create your own effect

Lindab's tile effect roofing is a strong, elegant steel sheet roof that looks great on new houses and blends beautifully into older, culturally sensitive areas.

You can choose between classic roofing colours and a wide range of modern tints. No matter which coating, profile and colour you opt for, the roof will be solid, attractive and long lasting.

Lindab's tile effect roofing in a nutshell

- strong and elegant
- for new houses and old
- easy to assemble
- low weight
- no risk of colours fading
- durability guaranteed
- high quality and finish

A complete solution from start to finish

Lindab's tile effect roofing has a core of hot-dip galvanized steel to prevent corrosion. You can choose from two PVC-free polyester surfaces depending on where and for what purpose the roofing is going to be used.

Several different coatings

Our polyester coating in matte or gloss finish is particularly adept at reducing the risk of colours fading. The matte finish has a timeless, classic look. The gloss prevents moss or algae from growing on your roof.

The HB polyester surface is developed for extra-tough resistance.

A complete roof system

There is an extensive range of battens and purlins to go with Lindab's tile effect roofing. We also produce the most comprehensive, effective roof drainage system on the market. Together with Lindab's flashings and roof safety options, you can be sure you'll have an elegant, easy-to-mount roof that will function superbly in all weathers.

It's no wonder steel has great advantages

Cutting costs, time is money, durability – those are today's buzzwords. Using steel as in Lindab's tile effect roofing ensures that your new roof is economical and long-lasting, without compromising on good looks or function.

Low weight

Tile effect roofing is a lightweight material. One of its many advantages is that it can be used on weaker constructions. Even better, lightweight sheet roofing means that the roof construction won't need to be reinforced during renovation. Its low weight also makes it an obvious choice for large roofs.

Easy to assemble and mount

You can order our tile effect roofing in lengths cut specially to your requirements. That means that assembly and mounting can be done quickly. Our specially designed fasteners and the complete range of flashings simplify assembly even further.

Durability guaranteed

We provide a generous warranty for all our tile effect roofing. And you will have certification that the roof will do what it's supposed to, for many years to come. For further information, please contact your local dealer.

Different solutions for different purposes

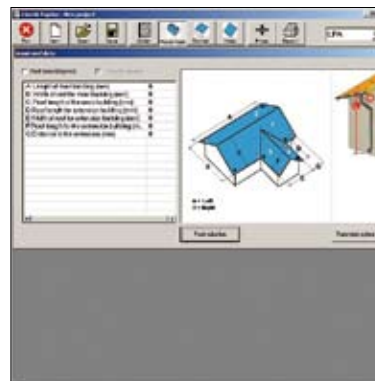

Flashings

There's a choice of standard profiles or special profiles on request to match the overall roof design.

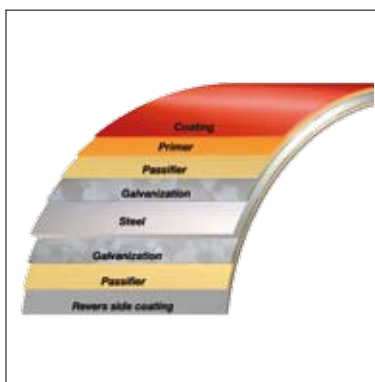

Fasteners

Lindab's fasteners come in a variety of colours and are rustproof for durability. They can be used for any material combination.

Software

Lindab Topline software provides comprehensive material specifications and drawings for nine of the most common roof types. There are options for dormer windows and chimneys.

Several layers for durability

Lindab's tile effect roofing is built up with layers of passivation, primer and polyester on hot-dip galvanized steel. The underside is coated with specially strengthened lacquer. All coatings are PVC-free.

Roof transitions

Lindab offers roof transitions in three widths and lengths for different chimney sizes.

A variety of profiles

The range includes:

- several profiles and designs
- facon cut profiles
- matte or gloss polyester or HB polyester coatings for various stress applications
- 23 colour coatings
- patented products

Strong coatings in a wide range of colours

The polyester coating in matte or gloss finish reduces the risk of colours fading. The HB polyester coating is an advanced combination of thicker layers and extra-tough grains to resist scratches and general wear and tear.

The colour chart may be subject to changes.
